

GUIDELINES FOR TRAVEL GRANT PROPOSALS

The Center for Cellular and Molecular Neuroscience is pleased to offer travel grants to deserving Caltech neuroscience graduate students and postdocs. These grants, as envisioned, will provide the opportunity to attend and present at an upcoming large conference, or a research-focused learning experience that will further their training, for example a summer school. The research being presented must have been carried out at Caltech. The grant will cover some or all of the costs to attend these events. The ideal applicant will have already applied and been accepted to present/attend. We encourage you to apply for funds from other sources as these may be matched. Travel grant applications must be submitted and approved before the conference occurs. The program does not provide retrospective funding for past conferences.

Please submit a request for funding containing the following:

- Full name
- Research Group
- Grad Student or Postdoc and year
- Option, if applicable
- Name of conference/educational experience you wish to attend
- Dates
- Location
- Title and abstract for presentation or poster you will be presenting, if applicable
- Proof of acceptance
- Additional funding that you have received from other sources.
- Budget/estimate of funds needed

Send a pdf file of your request for funding to Chen.Inst@caltech.edu. Applications accepted at any time as long as funds remain.
